+ userService: UserService

+ boardService: BoardService

+ taskService: TaskService

+ LoadData(): void

+ DeleteData(): void

- Changes
- Added a database and data access layer
 - Added unique identifiers to boards
 - Added the ability for users to join and leave boards created by other users
 - Added a way for the owner of a board to transfer the ownership to a different user
 - Added an "assignee" property to a task, and a way to control it
 - Added methods to retrieve a board's name and retrieve all the boards belonging to a user
